

Executive Biographies

Louis Poulin

Louis Poulin is Atvent Solutions' CEO and cofounder. He holds a bachelor's degree in Civil Engineering from McGill University (1991), and a MBA from HEC Montreal (1996). Before completing his MBA, Louis worked in consulting engineering for SNC-Lavalin and was involved in the planning and design of major Hydro-Québec dam projects in northern Quebec. From 1996 to 2003, Louis worked for Vidéotron Ltée, Canada's third-largest MSO, as HFC Construction Manager, then as Project Manager for HFC and Intercity Transport. In 2003, Louis assumed the role of CEO of Atvent Solutions.

Denis Audet

Denis Audet is Atvent Solutions' CTO and cofounder. He holds a bachelor's degree in Electrical Engineering from Sherbrooke University (1981). Before joining Atvent, Denis worked as a telecommunications hardware and software design consultant in Canada and the United States. He is responsible for developing a software interface for the radio frequency level meter HP Calan 3010. Denis has a strong sales and resource management background acquired over a 10-year period while working with a major Canadian broadband equipment supplier for the MSO market.
